

Dickinson Ranch

Producing seedstock since 1969

**Make sure your next herd bulls
will keep you in business!**

*Your next calf crop will produce the females that will be your cowherd
in the next downturn of the cattle cycle.*

Make sure they will be ~ functional ~ calving ease ~ forage efficient ~ bred for longevity
You can buy a bull anywhere! This bull season secure your future in the cattle business. Buy with confidence! These bulls and heifers are from generations of females that have proven they can function on stockpiled grass and minimal supplement. We haven't fed a cow in 15 years. All females calve in the open with no assistance (even 1st calf heifers). The guesswork is eliminated ~ if they don't function in our system they are gone. No excuses. Don't get caught up in the excitement of more is better. This bull buying season don't lose sight of what keeps the commercial cattleman in business!

Longevity ~ Cows that produce until 14 years old ~ Bulls that last 7-8 seasons

Fertility ~ Females that produce on your limited resources without extra feed

Calving ease ~ Calves that are born unassisted, get up and suck without human help, daughters that lay down and calve without human assistance.
